DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, 19-31, 37, and 38, drawn to a system for intercepting a request for content, creating redirection information for secondary content and returning this redirection information to the requesting client, classified in class 709, subclass 217.
 - II. Claims 14-18 and 32-36, drawn to a system for intercepting a request for content, generating a key based on the request and forwarding the key to the content source to obtain access to the information, classified in class 713, subclass 171.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in a system where keys must be generated in order to access information wherein the system of Group I may function without the use of keys. See MPEP § 806.05(d).
3. A telephone call was made to Barry Chapin on 02/10/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2153

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
